visitor seating

# Laguna

## ergonomic

The Laguna is designed to comply with exacting ergonomic standards, including features such as a waterfall seat front and backrest lumbar support.

The armrests curve gently downwards creating an ergonomically correct resting position for the arm and at the same time allowing the user to pull the chair under tables without damaging the armrest or table.

## stylish

The Laguna embodies smart design and elegant styling, making it perfectly suited for any modern architecturally designed interior space.

A range of upholstery options and veneer finishes allows you to customise your visitor seating to your specific requirements.

Sophisticated and versatile, the Laguna looks the part in any reception, visitor or conference environment.

## stackable

Stackable seating allows you to be prepared for any occasion - from small meetings to large conferences - and now it can look good too.

The single four legged steel frame with its uniquely designed seat pan protector enables Laguna to be stacked without damaging the surface or upholstery of each chair.
