

Remy

In the fight against poor posture, fatigue and stress, we've launched a powerful new solution, the Remy range of Task Chairs.

Ideal for the value conscious, the Remy offers operators a true ergonomic design with such a range of options, it's almost impossible to be uncomfortable. The Remy is available as an operator chair (with height and back pitch adjustments), or as a multi-function chair (with seat tilt as well). And with its high impact seat and back moulding, the Remy is hard working as you!

There are even some extra style options available, such as Ring moulded armrests.

Don't put up with your old back-breaker any longer, see our Remy range.

Also available with floor glides or 'Break Castors' when used on slippery floors.

The Remy Stool can be fitted with extra height-range gas cylinder for those special requirements.

The Remy Chair

Apart from the smart standard fixed arms, Remy can be fitted with Optional Adjustable Arms.

Hard wearing embossed mouldings to seat and back, perfect for those high traffic areas and willing to take all the abuse you can muster.

Remy offers great ease of use, with the standard simple two lever action (operator), with an optional multi-function adjustment (including seat tilt).
