

LCD Monitor Arms

PRIMA

Durable, Expandable and Cost Effective

Maximise multiple monitor viewing – minimise space and costs

Prima is a simple, durable and cost effective system to mount single or multiple LCD monitors above the desk. Save desk space, increase ergonomic flexibility and achieve easy monitor adjustment.

Adding a second or third monitor (or even a fourth, fifth or sixth monitor!) is simple.

Particularly suitable where expansion from a single desktop monitor to a dual or multiple monitor configuration is required, Prima's modular design allows upgrade from a single to multiple monitors in minutes, with minimal cost and disruption.

Various configurations are available: allowing up to six monitors to be supported on the one sturdy central steel pole mount. Foldable dual or single swivel extension arms adjust vertically up and down the pole, allowing screens to be positioned as desired.

Prima includes either a sturdy desk clamp or through-desk mount options, with complete screen adjustability. Screens rotate 360 degrees at up to three joints, while the monitor tilter mechanism offers over 270 degrees of vertical screen tilt.

Prima pole system – easy to instal

- Saves desk space
- Sturdy steel pole with aluminium swivel extension arm
- Adjust screen vertically up and down along the pole
- Pole can be moved to any desired position along the desk
- Effortlessly adjust monitor angle in all directions for different tasks or users
- Supports one or more LCD screens – easily upgradable
- Maximum comfort for individual posture and focal distance
- Quick installation with various options and mountings

Multiple LCD monitors – easy to configure

- Mount two or three monitors side by side above the work station
- Modular system easily expands to cater for up to six monitors per mount
- The ultimate in desk space saving
- Aluminium swivel extension arms allow for additional 215 mm depth or length to cater for larger screens or multiple mounts
- Allows ergonomic and versatile viewing angles
- Effortless movement of all LCD monitors simultaneously in any direction
- Maximise screen views without the need for larger desks or without compromising user comfort or accuracy

Prima LCD monitor mounts are made in an ISO 9001 and ISO 14001 quality assured manufacturing environment

Prima Features

- Simplified component structure - central steel pole, yoke, extension arm and tilter bracket, make Prima easy to maintain, configure and expand
- Support up to 10 kg per extension arm (most LCD monitors up to and including 23 inch)
- Easy assembly with modular tilt, rotate and twist action
- Includes 75 mm / 100 mm VESA mounting bracket
- External cable reticulation
- Full ergonomic functionality
- Fully upgradable - add additional components as required
- Suitable for nearly all VESA compliant LCD monitors from 14 inch to 23 inch
- Five year warranty
- Quality assurance: Prima LCD monitor mounts are made in Taiwan in an ISO 9001 and ISO 14001 quality assured manufacturing environment
- Customised heights and lengths available on request
